

Marshall & Swift Developer's Kits

Power Your System with Marshall & Swift Building Cost Valuations

Whether you are a Computer Assisted Mass Appraisal (CAMA) vendor or are creating your own valuation system, you need the cost approach methodologies pioneered by Marshall & Swift.

Developer's Kits contain Marshall & Swift's Cost Approach calculation engines, with data and algorithms for integration with most systems, large or small. Marshall & Swift Developer's Kits give you the industry's most trusted costing methodology for complete confidence in your valuations. Developer's Kits are built for Windows and support Microsoft Access and SQL Server for deployment flexibility.

The Commercial Estimator 7/Agricultural Estimator Developer's Kit

Automate commercial and/or agricultural valuations with the Calculator (square foot) method straight from the Marshall Valuation Service®, the industry's most comprehensive source for commercial building costs.

The Residential Estimator 7 Developer's Kit

Take care of your Residential and/or Mobile/Manufactured housing valuation needs with methodology based on the square foot method in the Residential Cost Handbook, the industry standard since 1954.
